

1000vdc solar panel bracket

Do I need A Z bracket for a small Solar System?

The system comes complete with all fasteners to secure the system to the installation surface. This system makes the installation of small solar systems easy,affordable and quick. Please Note: Not recommended for panels over 150 watt. If you do want to use this product for panels over 150 watt,you would need 2 sets of this Z bracket per panel.

Where do you put solar panels on a corrugated roof?

Generally speaking, there are pre-drilled mounting holes on the sides of your panels near the top and the bottom. As for a metal roof, it depends on what type you have. I wouldn't put these on a corrugated metal roof, period.

How do you secure a solar module?

Cable management clipsfor securing PV cables to the module frame. Clip to the underside of the module frame and electrically bond columns (stacks) of the PV array. Screws,nuts,bolts and more to make your solar installation successful. Restrain,secure and support piping,conduit,condensate lines and other round shapes.
