

Does accelleron offer auxiliary engine turbochargers?

For over a century, Accelleron has been an innovative leader in turbocharging. Visit Accelleron's newly revamped industry magazine. Accelleron launches new all-inclusive service agreement for auxiliary engine turbochargers. Discover our range of turbochargers for the marine industry.

Why did Accelleron close a \$24 million funding round?

Today, Accelleron announced it has closed a US \$24 million funding round to help develop prototypes of key reactor components and has now completed 100 hours of continuous fusion at its test facility at the Paul Scherrer Institute in Villigen, Switzerland. The experiments are aimed at gathering data rather than producing useful amounts of energy.

What is Accelleron fusion?

Accelleron Fusion is the latest startup to take a swing at this challenging nuclear-energy technology, banking on a novel approach that uses beams of heavy subatomic particles called muons to achieve fusion at much lower temperatures.

How does Accelleron slash the energy required to produce muons?

Accelleron's approach is to first try to slash the energy required to produce muons, in part by piggybacking on improvement in accelerator efficiency. This has jumped from around 20 percent in the 1980s to 50 percent today, Knaian says, and the U.S. Department of Energy targets 75 percent for next-generation accelerators.

Why did Knaian & Accelleron get a \$2 million grant?

Prompted by these advancements, Knaian and Accelleron cofounder Seth Newburg applied for a \$2 million Advanced Research Projects Agency-Energy grant to investigate ways to boost the efficiency of the approach, which they received in 2020. They won another \$500,000 in grant money from ARPA-E in 2023.

How hot can Accelleron fusion be?

Using this approach, Accelleron's plant could operate below 1,000 °C-- not exactly "cold" fusion, but not nearly as hot as other strategies such as magnetic confinement or inertial confinement. These other fusion approaches require temperatures in the millions of degrees to heat fuel until it becomes a plasma.

<p>Santo Domingo.- The energy transition involves shifting from an electricity production system based on fossil fuels--such as coal, petroleum derivatives, and natural gas--to one dominated by renewable and clean sources like water, sun, wind, and biomass. According to the "2023 Climatescope Ranking" by Bloomberg New Energy Finance (BNEF), which ...

The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas. Combining our respective relationships, expertise and innovative strategies, we

partnered through a new ...

Under the current government, the renewables transition in the Dominican Republic is quickly picking up speed. From 2020 to the end of 2023, electricity generation capacity from renewable sources has risen from 555.5 MW to 1,126.25 MW, which is an increase of over 103%. ... According to the Climatescope 2023 report by Bloomberg New Energy ...

The Renewable Energy Incentives Law (57-07) grants several incentives to businesses developing renewable energy technologies. This law was passed in 2007 as part of the Dominican government's efforts to invigorate local energy generation from renewable sources, as well as to promote the production of high-value renewable energy products.

The Dominican Republic will soon host its first testing laboratory for certifying energy efficiency in domestic air conditioning equipment, announced the Ministry of the Environment this Tuesday. The new laboratory, set to be established at the Autonomous University of Santo Domingo (UASD), is funded by the Multilateral Fund of the Montreal ...

The Latin American nation of the Dominican Republic targets to raise the share of renewable energy in its national energy mix to 25% by 2025 with solar energy being a major driver, according to the country's Minister of Energy and Mines Joel Santos.

<p>Santo Domingo - The executive director of the National Energy Commission (CNE), Edward Veras, announced during Energyyear Caribe 2024 that the CNE's board of directors approved the modification of Resolution CNE-AD-0004-2023, which raises the storage requirements for renewable energy projects. The new regulation, officially issued after ...

<p>Baní- The Punta Catalina Electric Generation Company (EGEPC) has solidified its position as a leading entity in the Dominican Republic's energy generation sector. Recent statistics from the Coordinating Body of the National Interconnected Electrical System (OC) highlight this dominance. From January to November, EGEPC contributed a total of ...

A Bright Future for Renewable Energy in the Dominican Republic . Minister Joel Santos concluded the ceremony by emphasizing the Dominican Republic's role as a leader in renewable energy within Latin ...

<p>Santo Domingo.- The Minister of Energy and Mines, Joel Santos Echavarría, announced on Thursday that the country set a new record for energy demand in August, reaching 3,729 megawatts. This marks an 8.9% increase compared to the same period last year, when the demand was 3,422.69 megawatts. "As of Wednesday, August 28, 2024, the National ...

With this capital infusion, Acceleron Fusion is well-positioned to refine its technology, expand its research, and take the first steps toward demonstration of an economical fusion power plant. By partnering with the

Acceleron energy Dominican Republic

energy and scientific communities, the company aims to make fusion a practical, game-changing energy solution. About Acceleron Fusion
