Photovoltaic modules are used to convert light directly into electricity. "Aerial photography, to me, is like data visualization for scientists," Hegen says in a 2022 interview with Fortune. "The elevated perspective has such a remarkable ability to show the scale and context of a landscape."

The photographer tells Fortune that he often sees unintentional artistic beauty in the way humans interact with the planet in large-scale ways. "[Aerial photography] shows dimensions and reveals insights we wouldn't be able to see from the ground," the photographer says.
