Who is Affordable Power Solutions?

Welcome to Affordable Power Solutions (PTY) LTD, your trusted partner for quality solar systems. As a privately-owned company, we specialize in the design, supply, and installation of solar systems, providing affordable and sustainable energy solutions to the general public, small-to-large enterprises, and commercial clients.

Can low-cost renewables reduce Türkiye's electricity demand?

According to this paper's scenario analyses, low-cost renewables can supply 55% of Türkiye's total electricity demand. Coupled with the electrification of end-use sectors, energy efficiency can reduce total power demand by 10% compared to a business as usual scenario by 2030.

What is the future of energy in Türkiye?

Transformative opportunities remain to be tapped in renewables, energy efficiency and electrification, building on remarkable recent progress. Approximately 70 percent of (gross) greenhouse gas emissions in Türkiye are energy-related, including from power, industry, transport and buildings.

Which energy sources are used in Türkiye?

Turkish Electricity Transmission Co. (TEİAŞ) General Directorate data shows that as of September 2022, energy from renewable energy sources (i.e., biomass, geothermal, hydro, solar, and wind) accounted for almost 55% of the installed power in Türkiye.

How to reduce energy demand in Türkiye?

Türkiye's energy demand growth dominated by fossil fuels needs to be reduced by an aggressive deployment of energy efficiency measures (Rosenow and Eyre, 2022), while fossil fuels need to be substituted by renewable energy coupled with an electrification of heating and transport (Gielen et al., 2019; DeAngelo et al., 2021).

Does Türkiye have a social assistance program?

Türkiye has mature social assistance programs to support poorer households, who tend to spend a larger proportion of their income on necessities like energy, so are often more sensitive to price increases.
