

Why is Africa important to South Korea?

Africa's importance in South Korea's future growth plan is underscored by the continent's possession of 30 percent of the world's critical minerals, such as cobalt, manganese, and chrome. These elements are essential for South Korea's industrial advancement especially the growth of its electronics and automotive manufacturing industry.

What are South Africa-South Korea relations?

South Africa-South Korea relations refers to the bilateral relations between South Africa and South Korea. During the 1950s, two countries fought together during the Korean War under the United Nations Command. Formal diplomatic relations began on December 1, 1992.

What's going on at the South Korea-Africa Summit?

For instance, Tanzania announced securing a \$2.5 billion loan from South Korea for infrastructure development while Ethiopia entered into a \$1 billion financing deal set to go to several sectors. Another key theme of the South Korea-Africa summit is sustainability.

"Even if the technology is small, as long as it is rooted in the local people, it will have a significant impact. When Korea was in poverty, we received a lot of help from the international community, now we feel it is our turn to help," said Kim Hwang Yong, director-general for Technology Cooperation Bureau of the Rural Development Administration, South ...
