

Albania solar products for home

Does Albania have a solar PV potential?

Explore the solar photovoltaic (PV) potential across 6 locations in Albania, from Tirana to Vlorë. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

Is Albania a good place for solar energy?

Albania gets about 2100-2700 hours of sunshine in a year so it has a great potential for solar energy. Solar energy is easily accessible since most energy comes directly or indirectly from the sun. It could be used for heating and lighting homes, commercial, and industrial buildings.

What is the ideal angle to tilt solar PV panels in Albania?

So far based on Solar PV Analysis of 6 locations in Albania, we've discovered that the ideal angle to tilt solar PV panels in Albania varies between 35° from the horizontal plane facing South in Tirana and 34° from the horizontal plane facing South in Vlorë.

What types of solar solutions are available?

On-grid solar solutions for residential, commercial, and utility scale projects. Residential and commercial hybrid solar solutions including battery storage solutions. If you have any questions or need help, feel free to contact with our team, or you can call us any time

What services does Vega Solar offer?

Vega Solar offers free consulting by preparing a project that suits your specific needs. Installation and configuration by qualified staff and German engineer. Periodic cleaning and inspection of your photovoltaic system with professional equipment. warranty. Invert On Grid by German and Austrian firms leader in the world market.

We are a Solar Related Products supplier serving the Albania, mainly engaged in the sale, quotation, and technical support services of various Solar Related Products products in the Albania region. We are a subsidiary platform of the Fortune Global 500 company CNBM, able to provide you with one-stop Solar Related Products procurement services ...

The project was promoted for its demonstration effect and the aim is to easily replicate it on other reservoirs in Albania and the wider region. The combination with a hydropower plant is also significant. The Vau i Dejës facility already includes a solar power plant on a dam. More renewable energy projects are under consideration in the area.
