Which solar generator should I buy?

With its durable enclosure and ergonomic design, the GB2000 is our top choice if you're looking to take your solar generator outdoors. The 2,106-watt lithium-ion battery packs plenty of power in a relatively compact package, and the "parallel ports" make it possible to connect two units together, effectively doubling the power output.

What is the best solar power generator?

As for solar charging, the Anker 757 supports up to 300 watts of input, putting it in the middle range compared to similarly-sized solar-capable generators on the market. If you're looking for an ultra-compact solar power generator, we recommend Bluetti's Portable Power Station EB3A.

Are solar power stations portable?

Comparatively, whole-house power stations, while heavy (100+ pounds), are technically portable since they can be moved, unlike standby generators. However, consumers are unlikely to haul one outside to charge via solar power.

How do you charge a solar generator?

A solar generator is essentially a large rechargeable battery that powers electronic devices. The fastest way to charge it is by plugging it into a wall outlet, similar to charging a phone or computer.

Are solar-powered generators safe?

In contrast, solar-powered generators are emissions-free, safe for indoor use and much quieter, ensuring they won't disrupt your household while keeping everything running. At the Good Housekeeping Institute, we got hands-on with over a dozen models to find the best solar-powered generators for various needs.
