Three independent voltage sensors monitor and report each cell-level voltage in the battery string for the ultimate in redundant over- and under-voltage protection. Over 3,000 independent sensors monitor the temperature throughout the TeraStor enclosure to provide a high-resolution, full 3D temperature map while in operation.

ABS is a team of experienced battery systems experts with decades of experience in designing, developing and manufacturing advanced battery systems for the transportation industry. Collectively, we helped launch some of industry's most well known programs with OEM customers like General Motors, Fiat Chrysler, BMW, Daimler-Mercedes and others.

Our Battery Management Systems (BMS) are developed using automotive-level design practices with AEC-Q components. Our systems are fully integrated into our products, offering worry-free operation. What's more, communications protocols are tailored to market sectors: CAN-Open for motive power, SAE J1939 for industrial equipment, and CAN2.0A for ...
