

Analysis of the latest price trend of photovoltaic panels

Are photovoltaic panel prices going down?

On average, prices in all module categories have been corrected downwards by around 10%. Never before in the history of photovoltaics have panel prices plummeted so significantly in such a short space of time.

Where are solar PV cost data taken?

Data are taken from the Microgeneration Certification Scheme - MCS Installation Database. For enquiries concerning this table email fitstatistics@energysecurity.gov.uk. Small scale solar PV cost data for 2023-2024 published. Small scale solar PV cost data for 2022-2023 published. Small scale solar PV cost data for 2021-2022 published.

How many GW will solar PV produce in 2024?

The current manufacturing capacity under construction indicates that the global supply of solar PV will reach 1 100 GW at the end of 2024, with potential output expected to be three times the current forecast for demand.

What happened to Photovoltaic prices in October 2024?

Overview by technology of different price points in October 2024, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

Why is monitoring the price development of solar modules important?

Monitoring the price development of solar modules is of crucial importance for investors, manufacturers and other players in the solar energy industry. A sound understanding of market trends makes it possible to make the most of opportunities and take forward-looking decisions.

Will solar prices fall again in 2024?

Expectations for the solar year 2024 Prices for all solar module types fell slightly again at the end of 2023 but that is the last time it could happen for a while and applies only to current European stock. Even panels currently in transit to Europe are being offered at prices EUR0.01 to EUR0.02 per watt higher.
