Will a 150 MW solar plant help Angola?

An agreement for the development of a 150 MW solar plant was signed between Angola's Ministry of Energy and Water and UAE-based renewable energy company Masdar in Dubai last December. The 150 MW project will produce electricity to power 90,000 homes, contributing to job creation, emissions reduction and efforts to increase national electrification.

What is the Angola solar project?

The Angola Solar Project creates new opportunities for Angolan communities that will no longer be forced to rely on and pay for gasoline or diesel generators. Each one of the five projects that comprises the Angola Solar Project will supply the needs of 500,000 Angolan homes, mainly in rural areas.

Does Angola need solar energy?

Currently, Angola's electrification rate is below 40% but the southern African country has plans to increase this rate to 60% by 2025 and solar energy has a key role to play.

Where will a 50 MWp solar plant be located in Angola?

Italy's Eni, and Angolan national oil company, Sonangol, have reached a final investment decision through its joint venture Solenova for the development of a 50 MWp solar plant in Angola. The plant will be located in the sunny city of Caraculo, situated in the Namibe Province.

How many solar plants are there in Angola?

Angola started operations at two solar energy facilities - the 188 MW Biopio Solar Plant and the 96 MW Baia Farta Solar Plant - in Benguela province in August 2022. The projects were developed by MCA Group with funding provided by the International Bank for Reconstruction and Development (IBRD) and the French Development Agency (AFD).

How will Angola's new solar power plant affect the environment?

The solar facility will mitigate the emissions of 224,000 tons of carbon dioxide while providing employment to 600 people. Developed in phases, the facility will be operational for 20 years and falls in line with efforts by Angola to generate 500 MW of renewable energy capacity by 2025.
