

Antique blue brick photovoltaic panels

Are Pompeii's solar panels terracotta bricks?

Pompeii receives over 3.5 million tourists each year from all over the world that come to admire the ruins left by the eruption of the Vesuvius that, in 79 AD, engulfed the city. None of them, however, are likely to notice the solar panels disguised as ancient Roman tiles or terracotta bricks.

Who invented photovoltaic panels?

They were developed and patented by the family business Dyaqua. "It is me, my father, my mother, and my brother," said Elisabetta Quagliato. "Since photovoltaic production is increasing, we are expanding and now have two employees."

Are elemex solar panels UV resistant?

As the panels are UV-resistant, they maintain their appearance over time. Attachment Technology: a proprietary integrated attachment technology developed and perfected by Elemex to panelize, mount and seamlessly integrate a variety of surfaces such as: Solar, Natural Stone, Sintered Ceramic, ACM, Aluminum Plate, and other specialty veneers.

Where do PV tiles come from?

These new tiles are called "traditional PV tiles" and come from Camisano Vicentino, a little Italian town halfway between Padua and Vicenza. They were developed and patented by the family business Dyaqua. "It is me, my father, my mother, and my brother," said Elisabetta Quagliato.
