

Are Canadian Solar photovoltaic panels good

Are Canadian solar panels a good choice?

Though Canadian Solar panels offer a good price, they have lower efficiencies than other modules on the market. With an average efficiency rating of 16.6% across their product line, their efficiency is lower than many of Panasonic or Sunpower's offerings.

Is Canadian Solar a good company?

I'm wary of using them based on things I've seen here and would love some firsthand testimony of the panels in question. Canadian Solar is a very reputable module manufacturer, around for 20 years or more. Despite the name it is a Chinese company. They supply a lot of large, utility-scale solar projects, less so small residential systems.

Why should you choose Canadian Solar?

Canadian Solar has a strong history of producing quality panels with the economic backing to likely ensure they fulfill their warranties. The fact that they are globally recognized and consistently one of the top three module manufacturers is a result of their workmanship.

What types of solar panels are available in Canada?

Much like the residential range, the most popular commercial panels from Canadian Solar are the Ku and HiKu series, which are also available in both polycrystalline and monocrystalline varieties.

Does Canadian Solar make solar panels?

Beyond manufacturing quality panels, Canadian Solar also manufactures and sells solar parks around the world. In fact, they recently sold three solar farms in Japan totaling 30.4 MW at peak performance. While the company might have global name recognition, do they make the right solar panel for your home?

How much do residential solar panels cost in Canada?

On top of being great quality panels, Canadian's residential solar panels come in at a great price too. Costing an average of \$2.60 per watt, expect to spend about \$15,600 for a typical 6 kW solar system using these panels. Keep in mind that this is just for the panels alone, no other additional costs.
