Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

What makes a solar panel a good choice?

Frame: Encases and supports the solar panel structure; aluminium offers the best durability and rigidity. Glass cover: Tempered glass protects solar cells while allowing daylight to pass through. Polymer sheet: Adds another layer of protection. Cells: Made from silicon, these convert sunlight into electricity.

Are solar panels a good investment?

Solar panel owners we've spoken to have had some quite different motivations: Wanting to charge their electric vehicle from solar panel electricity so that it's guaranteed 'green energy'. A long-term investment that's future-proofing against electricity price rises. Trying to reduce their carbon footprint and do their bit for the environment.

What are the best solar panels?

Our top pick of the best solar panels is the SunPower Maxeon 6AC 445W thanks to its high efficiency, good power output, and excellent warranties. Dr David Sprake, Programme Leader in Renewable Engineering and panel member at the Climate Regional COP Summit, also gave us his advice on choosing solar panels.

What are the different types of solar panels in the UK?

Monocrystalline and polycrystalline solar panels are the two most common types of solar panel in the UK. In the coming years, monocrystalline will take a significant lead over polycrystalline in terms of popularity, as all the best solar panels on the market now are made with monocrystalline.

Do solar panels fit on my home?

Typically, your chosen installer will buy the panels to fit on your home. Some only install solar panels from one brand, while others may install panels from a few brands. They may suggest a particular brand depending on your requirements.
