

# Are the wages for installing photovoltaic panels guaranteed

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

Do solar installers need a wage & apprenticeship?

For solar installers working on government projects, prevailing wage and apprenticeship requirements are not new. In the wind energy sector, where larger and more established companies dominate, there has not been widespread panic about these regulations.

Are prevailing wage laws good for solar?

Prevailing wage laws in the solar industry are beneficial for workers and the local economy as they require contributions to workers' benefits such as healthcare, paid time off, retirement funds, and apprenticeship training. However, the solar industry argues that these prevailing wage standards may make projects too expensive and could potentially halt solar development.

Do IRA prevailing wage provisions apply to solar projects?

The IRA's prevailing wage provisions apply to various clean energy projects relying on incentives, including but not limited to the ITC, a major contributor to the solar industry's growth for over a decade.

Does prevailing wage increase solar labor rates?

Prevailing wage in solar increases labor rates by 5-109% (when accounting for total compensation packages including healthcare, pension, and worker training contributions, and with a standard ratio of one apprentice to five journey-level workers). Our review of non-prevailing wage and prevailing wage in solar in Illinois indicated this.

Do prevailing wage standards slow solar development?

Prevailing wage standards are beneficial for workers and the local economy, but the solar industry argues that they will make projects too expensive and halt solar development. However, it's not true that prevailing wage standards slow solar demand. Why not?
