

How much debt does Terna have?

To finance the major increase in capex needed to drive Terna's growth and provide an increasingly efficient electricity system, capable of guaranteeing the country's energy security, net debt at 31 December 2023 amounted to EUR10,494.3 million, compared to EUR8,576.3 million at the end of 2022.

Is Terna's CAPEX sustainable?

In fact, 99% of Terna's capex is classified as sustainable based on EU Taxonomy criteria. To fulfil its role as Transmission System Operator and enabler of the transition, Terna has set a series of key objectives.

Is Terna a sustainable company?

The key driver in the Industrial Plan is the sustainability of investments, a concept embedded in the company's value creation process and in the benefits for the system and the environment. In fact, 99% of Terna's capex is classified as sustainable based on EU Taxonomy criteria.

What is Italy's Bess ambition?

Italy's BESS ambition is attracting investor attention. The country targets 71GWh (12GW to 15GW) of Terna storage tenders by 2030. Italy offers 12- to 14-year fixed-price long-term contracts, indexed to inflation, with Terna as the counterparty. First auctions are scheduled for December 2024, with the first capacity delivery expected in 2027.

How many GW of Bess are there?

Our group currently operates about 1.6 GW of BESS, mainly in the United States. There is also a global growth plan between now and 2026 for an additional 2.8 GW, of which nearly 2 GW is already under construction. This mainly relates to Italy (thanks to the results of the Capacity Market auction), as well as Chile and the Iberian Peninsula.

What will Terna expect in 2024?

Also thanks to the above initiatives, including those designed to further increase the efficiency of the electricity system, for 2024 Terna expects revenues at EUR3.55 billion, EBITDA of EUR2.42 billion and an EPS of EUR0.49. Regarding Capex, for the next year the Group expects a figure of approximately EUR2.6 billion in 2024.

Largo al sistema degli accumuli a batteria, il nuovo indispensabile "polmone" del nostro sistema elettrico. Promettono un vero salto di qualità (e di quantità) le aste del capacity market 2024 che partiranno il 21 febbraio 2022. Il rodaggio del sistema è ormai concluso e il nuovo mosaico della produzione e dei consumi di elettricità potrà guardare con più serenità; ...
