Where is ESA's crash site in Buenos Aires?

The actual crash site in the mountains is 138 km, as the crow flies, from ESA's station. The Malargüe station, Deep Space Antenna 3, is ESA's newest tracking station and is located 30 km south of the city of Malargüe, about 1200 km west of Buenos Aires, Argentina.

Why is ESA building a space station in Argentina?

It is the first infrastructure to be built in Argentina by ESA. "The site offers all the features that are required for a long-term ground segment investment. We are very pleased that we could pave the way for promising space missions with the support of the Argentine authorities," said Gaelle Winters, ESA Director of Operations and Infrastructure.

Where is ESA building a new 35 metre antenna in Buenos Aires?

On 22 June, ESA informed Argentine authorities that an area 30 km south of the town of Malargüe in Mendoza province, about 1000 km west of Buenos Aires, has been chosen as the best option to build a new 35-metre antenna in support of its programmes. It is the first infrastructure to be built in Argentina by ESA.

What if ESA gives a 10 percent antenna time to Argentina?

In exchange, ESA will make available to Argentina 10% of the antenna time for their national scientific projects. Argentina's Comisión Nacional de Actividades Espaciales (CONAE) is responsible for coordinating the use of the 10% of antenna time as provided in the agreement.

What's new at ESTRACK in Argentina?

The third station in Argentina will join these and the seven other 15m stations forming the core ESTRACK network. The 600-tonne dish will complete the 360-degree deep space coverage needed to ensure full telecommunications during mission-critical events and enhance the return of scientific data.

Argentina is expected to call for expressions of interest (EOI) for deployment of energy storage systems (ESS) in its electricity generation and transmission networks very soon, based on the country's latest official bulletin
