

# Atlas copco battery storage Gabon

The Zenergize range, introduced by Atlas Copco in 2022, is designed to meet the growing demand for battery energy storage systems. These units, powered by lithium-ion phosphate batteries, are 70% more compact than traditional alternatives, ensuring easy transportation and usability and safety.

Atlas Copco has added five new models to its range of lithium-ion Energy Storage Systems (ESS). Through its Power and Flow Division, the company has added a larger unit, the ZBC 300-300, as well as a smaller line of battery-based storage systems, the ZPB 45-60, ZBP 45-75, ZBP 15-60 models and ZBP 2000 with two flexible solar panels.

Battery energy storage systems are transforming the power supply sector by becoming the heart of energy efficient solutions. They are used in off-grid applications or to boost the limited grid available by efficiently storing and delivering energy to match the load demand.

Working off-grid or to boost the grid, standalone or in a hybrid solution, in parallel with other battery energy storage systems or as the central piece of a microgrid, they provide resilient and sustainable energy on demand - helping you lower emissions, meet regulations and cut costs through a seamless integration with low emission innovations.

Atlas Copco has added 120kVA and 150kVA capacity battery energy storage systems (BESS) to its range, extending upwards its line of canopy, portable models, which now comprises five units with power outputs

The Power and Flow division of Atlas Copco has launched five new li-ion battery energy storage system (ESS) solutions. The new ESS are intended for noise-sensitive environments, such as live events, inner-city construction sites and similar locations.

The innovative system, which delivers the highest power with capacity of up to 150kWh in a portable model, is built on Atlas Copco's proven lithium-ion battery technology so operators in noise-sensitive environments such as construction sites and events, can benefit from clean, quiet energy to reduce their emissions.

Découvrez Atlas Copco et ses groupes électrogènes dans les magasins Diesel Gabon de Libreville, de Port-Gentil et Moanda. La visite virtuelle de notre showroom vous permettra de vous faire une première idée de vos besoins.
