What is augwind energy?

A unique energy efficiency solution for air compressors in industry, enabling production continuity and significant cost reduction using underground air storage operated by AUGWIND's unique control system. Augwind Energy is an Israeli technology company revolutionizing energy storage by storing compressed air underground.

Who is augwind?

Augwind is actively installing and maintaining operational compressed air storage units throughout Israel. This experience has refined Augwind's understanding of the energy industry to a point where they are ready to apply their knowledge to develop the next evolutionary stage in energy storage.

Does augwind save energy?

In existing installations, Augwind's solution has been shown to save up to 50% of power consumption to the air delivery system. Augwind has designed and installed their patented compressed air storage units for large industrial plants all across Israel, including top tier-1 factories from the dairy-food, aviation, plastic industries and more.

How does augwind work?

Augwind operates on two fronts: the energy storage market and the air compressor market. It operates in both using an underground air compression technology that enables savings of up to 40% in the energy consumption required to compress the air at high pressure.

What happened to augwind energy & biomedico Hadarim?

In 2019, the company had completed a merging process with the public company "Biomedico Hadarim" (currently named Augwind Energy), which trades on the Tel Aviv Stock Exchange. Augwind Ltd. has developed state of the art underground compressed air storage units that store large amounts of compressed air at high pressure.

How efficient is augwind's air battery system?

Augwind's AirBattery system has an energy efficiency that is generally similar to the efficiency of pumped storage stations.
