

Will Bosch invest 3 billion euros in climate-neutral technology?

To help business and society reduce dependency on fossil fuels and harness new forms of energy, Bosch intends to invest some three billion euros in climate-neutral technology, such as electrification and hydrogen, over the next three years.

What makes Bosch a good company?

Advanced production machinery and highly qualified employees guarantee efficient production with a focus on sustainability, safety and quality. This is demonstrated by numerous certificates and approvals. As a system provider, Bosch produces boiler house components and control systems, along with the associated software, at the Gunzenhausen site.

Why is Bosch developing electrolyzers?

This is why Bosch is branching out into the development of components for electrolyzers, which use electrolysis to split water into hydrogen and oxygen. Ideally, the electricity for this purpose is generated from renewable sources such as wind or photovoltaic power, in which case the result is known as "green hydrogen".

Will Bosch develop electrolyzer components for mobility solutions?

Drawing on this expertise, Bosch will assign the development of electrolyzer components to the Mobility Solutions business sector, investing up to 500 million euros in this venture by the end of the decade.

What is Bosch doing in the automotive industry?

Bosch is branching out into the development of components for electrolyzers, which use electrolysis to split water into hydrogen and oxygen. The ongoing transformation of the automotive sector presents a huge challenge for the industry as a whole. As ever, Bosch's response here is to innovate.

Where are Bosch electrolyzers made?

These include Bamberg and Feuerbach (Germany), Tilburg (Netherlands), Linz (Austria), and ?esk&#233; Bud?jovice (Czech Republic). Bosch is branching out into the development of components for electrolyzers, which use electrolysis to split water into hydrogen and oxygen.
