

Does Austria generate solar power?

Austria generates significant solar power, with an installed capacity of around 2.6 GW in 2021. The government is concerned about climatic change and rising air pollution and has a roadmap to increase the share of renewable energy, such as solar, in its energy mix during the study period.

Where is the largest solar power plant in Austria?

Construction began on Austria's largest solar power plant, a 120 MW solar park, in Nickelsdorf, a small town in eastern Austria [in June 2022]. It is part of a hybrid wind-solar project with a 164 MW wind farm.

Who is Austria Energy Group?

The Austria Energy Group was founded in Vienna, Austria in 2006, where its headquarter is located with subsidiaries and offices in Europe and Latin America. Since its commencement, the Group has been focused on the site development and technology integration, construction (EPCM), operation and management of renewable power plants.

Will solar power increase in Austria in 2050?

According to the National Energy and Climate Plan, Austria's goal for solar photovoltaic (PV) power production is 5 TWh in 2050. This target will likely increase the solar PV installed capacity during the forecast period.

Will Austria increase solar thermal technology in 2023?

The Austrian government's plan to accelerate the expansion of photovoltaics with a budget of USD 647 million in January 2023 is likely to increase the use of solar thermal technologies in the coming years. The Ministry has also raised the funding budget for small-scale systems.

Will Austria achieve 100% renewable electricity generation by 2030?

In addition to supporting PV installations through permitting simplification and cash grants, the Austrian government is targeting 100% renewable electricity generation by 2030.
