What is energy in Algeria?

Energy in Algeria refers to energy and electricity production, consumption, and import in Algeria. The country had a primary energy use of 462 TWh in 2009 with a consumption of 13 TWh per million persons. Algeria is an OPEC country.

How can automated energy work for You?

Learn how Automated Energy can work for you. Founded in 1999, Automated Energy Inc. provides data-driven solutions to improve customer engagement for municipal utilities and help manage energy consumption and costs for commercial and industrial consumers throughout the United States.

Does Algeria have solar power?

Thanks to vast desert areas and long sunshine hours, Algeria boasts considerable solar potential. That explains why the country predominantly aims to improve its solar photovoltaic infrastructure to drive the clean energy transition rather than focusing on hydro and wind power plants.

What is Algeria's energy mix?

Despite the recent increase in renewable energy capacity and generation, ambitious targets, and investment plans, Algeria's energy mix has remained predominantly fossil based. In 2021, almost all the energy produced in the country was derived from natural gas and oil products. The same applied to the type of power consumed.

Does Algeria have a nuclear power plant?

Algeria has operated research reactors at Draria and Aïn Oussera since 1995. It has signed nuclear cooperation agreements with Russia (2007), the United States (2007), and China (2008), and has discussed nuclear cooperation with France. Algeria is a member of OPEC but does not currently have a functional nuclear power plant. Since 1995, Algeria has operated research reactors at Draria and Aïn Oussera.

Algeria, long renowned for its abundant hydrocarbon resources, is now navigating a dual path: sustaining its role as a key natural gas supplier to Europe while rapidly accelerating its energy transition ambitions.
