

What is a Modula automatic vertical tray warehouse?

Modula automatic vertical tray warehouses allow you to store goods in an clean,tidy,safe and fast-moving system,reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What are vertical storage solutions?

Vertical storage solutions are perfect for making the most of the height available in buildings,saving floor surface. These products are the ideal answer for a clean,tidy,safe and fast-moving warehouse.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time,Modula automated vertical storage solutionsare suited to any type of product,in any industry sector or environment,and can be customised to various payloads,heights,sizes and options.

What is an automatic vertical tray warehouse?

The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods. Instead,the products are brought directly to the picking bay.

How can vertical solutions save your warehouse floor space?

Vertical solutions can save up to 60%of your warehouse floor space and dramatically increase the pace of accessing and retrieving items from storage. Our specialists will be happy to develop a solution that meets your specific storage and intralogistics requirements. Contact us for more information and details.

The benefits of Modula vertical automated warehouses: Space Efficiency: Save up to 90% of the occupied floor space compared to traditional storage solutions. Time Savings: Expedite ...

Best Practices for Maximizing Efficiency with A Automated Vertical Storage Solution System. While implementing vertical storage solutions is a great way to optimize your warehouse space, it's essential to follow best practices to maximize efficiency and achieve the desired results. Here are some tips to help you make the most of your vertical ...

Automated vertical storage system Latvia

Modula is an automated vertical storage system with a series of trays which is designed to optimise space, work and warehouse management. It is the ideal solution for issues surrounding the management, picking and retrieval of components, as well as semi-processed and finished products, in a diverse range of Industries and applications.

Several material handling equipment manufacturers design, engineer and manufacture a wide variety of self-contained, goods-to-person, automated storage and retrieval systems (AS/RS). With the focus shifting from picking pallets and cases to picking individual items or "eaches", there has been an explosion of types of ASRS technologies available in the market to help warehouse, ...

A vertical lift module, also known as tray lift and lift storage system, is an automated storage system for small parts. A vertical lift module resembles an oversized drawer cabinet made from metal with two large warehouse areas (carrier areas). The carrier areas can be compared to a ...

Vertical storage is a type of storage system that utilizes the vertical space of a facility, maximizing storage capacity while minimizing the floor space required. This is achieved through the use of vertical lift modules (VLMs), which are automated storage and retrieval systems that consist of two racks of shelves stacked upright with an ...

Today we are one of the world's leading manufacturers of automated vertical lift systems and storage carousels for both industrial and office applications. Our range of high-tech automated solutions includes Hänel Rotomat® industrial and office carousels, the Hänel Lockomat® and the proven Hänel Lean-Lift® and Multi-Space® vertical ...

Advanced Storage & Retrieval Systems, Inc. (ASRS) is the Southeast distributor of Hänel automated vertical lift systems and storage carousels. Using this highest quality equipment, we help customers cost-effectively streamline and upgrade the material handling functions at their manufacturing, operations, warehouse and distribution facilities ...

The Automated Storage and Retrieval System (AS/RS) is central to this modern operational competency. An AS/RS is a mechanized or robotics system engineered to expedite the storage and retrieval of goods within a warehouse environment, optimizing space utilization and significantly improving the overall workflow.

Learn how Modula's automated vertical warehouses and advanced picking solutions, like put to light systems and picking carts, enhance order processing speed, minimize errors, and improve warehouse operations for various industries. <https://smart-storage/modula/> #smartstorage #modula #warehouseautomation #warehouselogistics #verticalstorage # ...

Automated Storage & Retrieval Systems At Randex we recognize that one size does not fit all and that you need a system to meet your exact needs. Whatever your storage application requires Randex is able to provide the solution for ...

Vertical Lift Modules (VLMs) are automated storage and retrieval systems commonly used in warehouses and distribution centers to store and retrieve small-to-medium-sized items in a compact and organized manner. VLMs consist of a series of vertically arranged trays or shelves that are enclosed in a tall, narrow cabinet. The trays are accessed by an automated lift system ...

Dexion Tornado storage machine is rapid, energy-efficient and silent automated storage and handling system, which operates on the "goods to person" principle. It is easy to tailor to each customer's needs. Tornado Lift machine offers safe and secure storage for storing and handling your small items in your warehouse or shop.

Vertical Lift Modules (VLMs): VLMs are ideal for vertical storage. They use an elevator system to bring trays with stored items to an access point, optimizing vertical space usage. Vertical and Horizontal Carousels: These rotating storage systems bring items to the operator, minimizing walk time and improving picking speeds.

A vertical carousel (VC) is an automated storage and retrieval system that is designed to store inventory while reducing the floor area needed for storage, thanks to its upright and compact structure.. A typical vertical carousel comprises a series of carriers that are securely mounted on a closed-loop vertical track, all enclosed within a metal casing.

Storage-Retrieval Machines and Shuttle Systems for Miniload Systems . SSI SCHAEFER's storage-retrieval machines and shuttle systems are the solution for fully automated storage and retrieval of containers, cartons, and trays. They guarantee rapid and flexible material transport together with short access times.
