Hut and metallic shack next to a high voltage electricity substation. In the 1980s, charcoal and fuel wood met more than 95 percent of Uganda's energy needs. [4] In 2005 and 2006, low water levels of Lake Victoria, the main source of the country's electricity generation potential, led to a generation shortage and an energy crisis. [5] [6] As a result, the country experienced frequent ...
