What is a solar backup generator?

Solar backup generators provide a portable solar power supply. Instead of having a permanent solar installation in your home, complete with roof panels and a large battery bank, a solar generator packages everything in one relatively small unit. Solar backup generators have five main components: Solar panels to capture sunlight.

What is the best solar generator for home backup?

The Renogy Lycanis is one of the largest and most capable solar generators in the market right now. It's designed to be wired to a home power grid. You can even set it up as a UPS, ensuring essential appliances stay powered in a blackout. That, plus its fast charging performance makes the Lycan 5000 one of the best solar generators for home backup.

Are solar backup generators a good idea?
