What services are included in a back up Power Plan?

Specific to the risk of a power outage, services to address in your back up power plan include: uninterruptible power supply (UPS) equipment and its maintenance, for short-term outages standby on-site generator capacity and automatic transfer switch to supply power the moment utility power is unavailable, and for a longer period thereafter

Can You Turn your home into an energy island?

However, much like islands are forced to be self-sufficient if you install a battery with islanding capabilities, you can turn your home into an "energy island." As a result, islanding allows you to keep your home powered regardless of what's occurring on the rest of the grid, including during weather-related outages.

Do solar inverters work if there is a power outage?

In other words, solar inverters are explicitly designed not to allow your solar panels to continue to push electricity into your home in the event of an outage. This occurs primarily for the safety of utility line workers tasked with responding to an outage and getting the electrical system back up and running smoothly.

Does islanding mean your home has gone off-grid?

Importantly, islanding does not mean that your home has gone off-grid. In almost all scenarios, your home will remain connected to the rest of the electrical grid even after installing solar and storage on your property.
