A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.

Backup Power: Our Conclusion. Backup power systems protect your home against the inconvenience and potential dangers of power outages. Whether you choose a portable generator for occasional use, a comprehensive standby system for full home coverage, or an eco-friendly battery solution, having a backup power plan is a wise investment for any ...
