

# Bahamas back up solar batteries

In a solar battery back-up system, the battery needs to hold enough power for your everyday use while keeping some energy in reserve in case a power cut happens. The larger the capacity of the battery in kW, the more energy you can reserve for power cut back-up and the more appliances you'll be able to run during a power cut.

Your answer will determine the solution that fits you best - whether a battery system for backup power, or a grid-tied system to save money faster. And, of course, if you absolutely have to have both, and you don't mind putting out a little extra capital, you can get a bimodal hybrid system to save money and provide backup.

The Caribbean island nation of the Bahamas is turning to independent power producers (IPPs), the

## Bahamas back up solar batteries

combination of "solar plus storage" and hybrid microgrids to extend sustainable energy access, improve energy reliability and resiliency, and reduce carbon emissions and environmental footprints on four of the archipelagic nation's 30 inhabited islands (pop. around 400,000).
