

How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.

How is Bahrain navigating the energy transition?

Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

Why is Bahrain reorganizing its oil & gas company?

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

Does Bahrain have a hydrogen industry?

Bahrain has taken its first steps to develop a domestic hydrogen industry. In November 2020 the kingdom signed an agreement with hydrogen producer Air Products to assess the potential development of a hydrogen economy in the country. The SEA unveiled plans for a 4-MW green hydrogen plant in December 2021, which would be a first for the region.

Does Bahrain store personal data?

It does not store any personal data. Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

Bahrain: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).

Bahrain's Energy Sector Enters Historic Era with Major Milestone of Bapco Modernization Program. In the next 60 days, the Kingdom of Bahrain's energy sector will achieve a pivotal milestone as Bapco Refining, a subsidiary of Bapco Energies, embarks on an important phase of its refinery modernization startup journey.
