

What is the energy supply in Bangladesh?

In the People's Republic of Bangladesh (hereinafter referred to as "Bangladesh"), per capita total primary energy supply in 2020-21 was 331kg in oil equivalent, which was below one-fifth of the world average (1,801kg in 2020)⁵.

Why are interconnections important for power supply in Bangladesh?

These interconnections are important options in terms of security and reliability of power supply in Bangladesh. The mode and interconnection points could be identified through detailed technical, financial, and environmental studies. According to the power source plan, power import requirement will increase in 2030 and onward.

How does BPDB sell electricity in Bangladesh?

In Bangladesh, BPDB purchases electricity from generation companies as a single buyer and sells it to distribution companies on bulk electricity tariff. Distribution companies then sell electricity to final customers on retail electricity tariff.

Which sector consumes the most energy in Bangladesh?

According to the IEA statistics, residential sector energy consumption dominates in Bangladesh, though its share declined to below 50% in 2020. Meanwhile, the share of commercial sector energy consumption was reported to be only 2.4% in 2020. Biomass consumption mainly comprising firewood is listed only for the residential sector.

Is there a demand for air conditioners in Bangladesh?

Although the market in Bangladesh is still small, its demand is growing steadily. Penetration of inverter type (variable speed) air conditioners, that are 15-30% more energy efficient than non-inverter types (fixed speed), remains at 42% in the Asian market.

Why should Bangladesh invest in power system development?

Power system development in Bangladesh will require a significant amount of investment because of the sustained power demand growth in the coming decades.

In Bangladesh, electricity is available for 85% of the population, up from 20% in 2000. Gas accounts for the majority of the country's electricity production, even though wind, hydropower and solar PV shares are growing. Bangladesh has also implemented energy policy incentives towards the deployment of renewables.
