Who is barefoot power?

Barefoot Power is a leader in the design, manufacturing and distribution of solar powered assets that enable sustainable lifestyles and generates income to off-grid/weak-grid households and communities in Africa and South Pacific.

Where is Tongatapu solar farm located?

Prime Minister of Tonga today announced the official launch of the 6-MW power purchase agreement (PPA) based Tongatapu Solar Farm located at Fualu, Tongatapu, which has supplied electricity to over 10,336 households since August this year.

Who are Sunergise New Zealand & Tonga Power Limited?

This solar project was completed under the partnership between Sunergise New Zealand Limited and Tonga Power Limited with support from the Asian Development Bank (ADB). Sunergise led the construction and meanwhile united local Tongan civil, mechanical and electrical sub-contractors to the team.

What is a barefoot go portable solar light?

The Barefoot Go portable solar light has been specifically designed to meet the needs of rural markets. Barefoot Power are innovators in solar - they were the first, and best, to lead the charge in the solar home system and connected accessory markets.

What does Sunergise's 6MW solar system mean for Tonga?

As Hu'akavameiliku, Prime Minister of Tonga said at the ceremony: "The successful completion of the Sunergise's 6MW Independent Power Producers solar generation system today, demonstrates the major role renewable energy independent power producers play towards achieving our 70% target by [the] end of [the] year 2025."

Why do we need solar power in Tonga?

Renewables like solar are a significant means for Tonga to expand energy access, stabilize power grids as well as reduce pollution. Considering the shortage of solar expertise and finances for countries like Tonga, the role of independent power producers and the practice of PPA provide solid support to smooth the way for solar deployment.

FPL Barefoot Bay Solar PV Park is a ground-mounted solar project which is spread over an area of 462 acres. The project supplies enough clean energy to power 15,000 households, offsetting 118,000t of carbon dioxide emissions (CO₂) a year. The project cost is \$115.365m. The project consists of 330,000 modules.
