

What is batteries Sweden?

Batteries Sweden (BASE) is a competence centre for battery research funded by Vinnova. With innovation-driven research projects, where academia and companies collaborate, BASE creates a stable platform for excellent world-leading battery research in Sweden.

Why should you invest in batteries in Sweden?

Batteries enable the phasing out of fossil fuels and increase flexibility in the electricity system through energy storage. The Swedish battery industry is at the forefront. Sweden also has related strengths and opportunities in areas such as vehicles and electrical systems, as well as a strong mining cluster.

Are batteries the key to achieving Sweden's climate goals?

Batteries are a crucial piece of the puzzle if we are to achieve Sweden's climate goals with net-zero emissions by 2045. Batteries enable the phasing out of fossil fuels and increase flexibility in the electricity system through energy storage. The Swedish battery industry is at the forefront.

Is Sweden a good place to invest in lithium-ion batteries?

"Sweden is well-positioned in this area. We're a major producer of lithium-ion batteries, which in fact will be able to contribute to the green transition and help transform Sweden's industrial landscape. But there is also an acute shortage of skills in the battery area in Sweden.

How much does the batteries Sweden competence centre cost?

Anneli Björkman The Batteries Sweden (BASE) competence centre at Uppsala University is being funded equally during 2020 - 2025 by Vinnova, the participating higher education institutions, and the participating companies - one third each. The total budget is approximately SEK 100 million.

Why is battery demand so high in Sweden?

Battery demand is skyrocketing as it takes over as the primary power source, replacing high carbon, dirty fuel sources. Sweden has the geographical, intellectual and manufacturing edge to help companies develop and design long-term sustainable solutions across the entire production chain.

BMU is the Battery Management Unit; it manages the battery's charge and discharge, collects information from the battery and reports to the inverter. Main functions: CAN / RS485 communication with inverter; RS485 communicate ...
