

What is the battery breakthrough initiative?

Announced in the 2024-25 Federal Budget in May, the Battery Breakthrough Initiative aims to fund projects that enhance the development of Australia's battery manufacturing capability to improve supply chain resilience and provide opportunities for Australia's economy and workforce in the renewable energy transition.

Why is Australia investing \$500 million in the battery breakthrough initiative?

Investing more than \$500 million to establish the Battery Breakthrough Initiative to grow Australia's battery manufacturing capabilities. This investment will see Australian industry secure more value from our natural resources, diversify global battery supply chains and support the global transition to net zero.

What is the future battery industries Cooperative Research Centre?

Future Battery Industries Cooperative Research Centre to map Australian battery capability and value chains, drive battery innovation and scale-up and deliver best practice guidelines and standards for the battery industry. Powering Australia Industry Growth Centre to develop workforce skills and training.

What is the \$523 million battery breakthrough initiative?

Minister for Industry and Science Ed Husic has today released a consultation paper on the \$523 million Battery Breakthrough Initiative. The Battery Breakthrough Initiative is the centrepiece of the National Battery Strategy which sets out a pathway to capture the once in a generation opportunity.

Can Australia build a thriving battery industry?

Australia is another step closer to building a thriving domestic battery industry and a Future Made in Australia. Minister for Industry and Science Ed Husic has today released a consultation paper on the \$523 million Battery Breakthrough Initiative.

How much money did Arena spend on the battery breakthrough initiative?

Funding for the Strategy was included in last week's Budget: \$523.2 million for the Battery Breakthrough Initiative, administered by ARENA, to promote the development of battery manufacturing capabilities through production incentives targeted at the highest value opportunities in the supply chain.
