

Benin solar green capital

Who can benefit from a new off-grid solar scheme in Benin?

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.

Does Benin have a green economy?

The PREVER I programme to promote Benin's green economy ('Promouvoir l'économie Verte au Bénin') was launched in 2017. It supports the generation and distribution of renewable electricity by reducing the costs of the national network.

Will EIB support Engie to deploy off-grid solar power in Benin?

The new Benin cooperation follows EIB's previous support for ENGIE to deploy off-grid solar power in Uganda. Benin is the sixth African country to benefit from the EIB's streamlined support for African off-grid energy investment, following recent backing for projects in Mozambique, Uganda, Chad, the Democratic Republic of Congo and the Comoros.

Why should Benin invest in a defissol plant?

The DEFISSOL plant will help generate and distribute clean and reliable energy for all the people of Benin. It will supply the country with 35 GWh of electricity a year, covering the consumption needs of around 180 000 people and reducing greenhouse gas emissions by 23 000 tonnes of CO₂ a year over a 25-year period.

The American Green Bank Consortium is a network of partners composed of green banks, community development financial institutions, capital providers, developers, community benefit organizations, and other clean energy supporters working to expand and accelerate innovative clean energy investments across the United States.
