AFD and the Polynesian authorities have jointly defined a support program to assist French Polynesia with its energy transition. By 2030, the renewable energy penetration rate in power generation will reach about 75%.

French Polynesia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

SARL BERGAN ENERGY se pose comme un maillon fort de ce qui pourrait devenir un réseau d'intégrateurs locaux, capables de répondre aux demandes d'une future industrie automobile en Algérie.

Client: Energypac Power Venture Ltd. Project Overview: In alignment with the Bangladesh government's ambitious plan to more than double the nation's power generation capacity to 38,000 MW by 2030, Energypac Power Venture Ltd. ...

The Bergen name is a watchword for quality and reliability in its field. The tradition of engineering in Bergen, Norway, dates to 1855 when the original company Bergen Mekaniske Verksted (BMV) was founded. In 1946, the company built its first diesel engine and has since commissioned over 7,500 of its iconic liquid and gas fueled engines.

On Land, Bergen Engines is finding new focus in supporting hybrid energy systems that combine multiple
