Is energy a real opportunity in Bermuda?

Energy is very expensive in Bermuda, with electricity costing approximately 40 cents a kilowatt-hour, almost 20 cents of which is attributed to fuel. The company sees an opportunity to do in Bermuda what it is doing in the US Midwest in terms of replacing fossil fuel energy generation with renewables.

Why is Bermuda so dependent on fossil fuels?

Historically like other modern developed countries around the world, Bermuda has depended on fossil fuel for energy production for electricity, heating, cooling and transportation.

Is biomass a source of electricity in Bermuda?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bermuda: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Are offshore renewable resources needed in Bermuda?

"Due to Bermuda's land constraints, offshore renewable resources are needed to reach higher levels of renewable generation. "Floating solar resources have previously been mostly in ponds and reservoirs but are more recently being developed for the ocean.

What is Bermuda's 'preferred portfolio'?

The "preferred portfolio" proposed in the Regulatory Authority of Bermuda's 2023 Integrated Resource Plan would add an extra ten years to the life of the Belco utility plant's East Power Station engines, and would deliver "85 per cent renewable energy by 2040", cutting carbon emissions by 82 per cent by 2043 compared with 2022 levels.

Bermuda's largest solar panel system is on the roof of the new Acute Care Wing of the King Edward VII Memorial Hospital. The state of the art solar plant installed by Bermuda Engineering Co. Ltd (BE Solar) for Paget Health Services comprises nearly 1000 square feet of panels to capture the energy of the sun and use it to heat water.
