

Renewable electricity. While your energy won't all be green, your supplier will buy enough renewable electricity from the network to match your use, so the net effect of you using a 100% renewable supplier is as if all your energy was renewable. It also encourages more renewable investment.

Table B.2: Capital and Generation Costs of Renewable Energy 31 Table B.3: Capital and Generation Costs of Fossil Fuel Energy 32 Figures Figure 2.1: Business as Usual (BAU) Electricity Matrix, 2015-2035 2 ... energy give Bermuda the opportunity to change how it sources and uses energy. Introducing

14 July 2011 Bermudan electricity supplier, BELCO is planning to work closely with government on a range of renewable energy solutions, including waste to energy projects, according to a report in the Bermuda Sun. Andrew Parsons, president of BELCO, is reported to have said that the utility is targeting 20% of electricity from green sources by the end of the decade.

Today, we remain committed to providing reliable, safe energy to the people of Bermuda, a task dutifully performed by a team of more than 230 staff, of which 95% are Bermudian. The Company provides power to approximately 36,000 metered connections and the Company is working toward a renewable energy future and achieving Net Zero by 2050.

While we analyse the options for economical, large-scale, renewable power, we are laying the foundation to support Bermuda's transition, which includes retiring old engines; making internal practices and efficiencies ...

The renewable energy landscape is not uniform. Market dynamics and state-level initiatives continue to drive much of the sector's growth. California and Texas, for instance, have invested heavily in solar and wind projects; Texas alone accounts for nearly 50 major renewable energy projects currently under development.
