

Bess near me South Africa

Where is Bess located in Africa?

Replicating successes from our hybrid solar and battery storage projects at Kenhardt, we will proceed to construct one of Africa's first and largest standalone dispatchable BESS systems. The project is located near Kathu, Northern Cape, close to high power demand centres.

How much does Bess cost in Africa?

The project's total cost is R3bn (\$170m), with Scatec's EPC contracts accounting for 83% of the investment. The project is Africa's first and largest standalone dispatchable BESS. Credit: Phonlamai Photo /Shutterstock.

What is the Bess project?

The BESS project serves as a direct response to meet one of the urgent needs to address South Africa's long-running electricity crisis by adding more storage capacity to strengthen the grid while diversifying the existing generation energy mix. It uses large scale utility batteries with a total capacity of 1 440MWh per day and a 60MW PV capacity.

Where is Eskom's Hex Bess project located?

Eskom officially opened the Hex BESS site at Worcester in the Western Cape yesterday. The Hex BESS is the first project to be completed under Eskom's flagship BESS project announced in July 2022 to help alleviate the pressure on the national electricity grid.

Who financed the Bess project in South Africa?

The BESS will be financed by ZAR 2.7 billion of non-recourse project debt, with the Standard Bank of South Africa tapped as lead arranger, while the remainder will be covered by equity from the owners.

What is Eskom's Bess project?

Eskom has taken the necessary steps to ensure the successful implementation of the BESS project. Through the BESS project, Eskom aspires to diversify the existing generation energy mix by pursuing a low carbon future in order to reduce the impact on the environment.

K2022593039 (South Africa) Pty Ltd, The Applicant, is applying for Registration in terms of the "Norm for the Exclusion of Identified Activities Associated with the Development and Expansion of Battery Storage Facilities in Areas of Low or Medium Environmental Sensitivity" for the proposed Tlholo Battery Energy Storage System (BESS) near ...

Norway-based independent power producer (IPP) Scatec has started operations on three solar-plus-storage projects in South Africa, totalling 1,140MWh of BESS capacity. Located in the Northern Cape province, the Kenhardt project consists of three solar plants and a battery energy storage system (BESS) with a capacity of 225MW/1,140MWh.

The ever decreasing natural forage of bees in South Africa limits the production of honey to about 10 - 12 kg per colony in a year. This is much lower compared to the USA (30 kg/year) and Australia (50 kg/year). In addition, the price for honey in South Africa is low and further under pressure from cheaper imports priced at R50/kg (2017).

The company is preparing to begin the construction of the project, Africa's first and largest standalone dispatchable BESS system, near Kathu in the Northern Cape. Scatec will hold a 51% equity share in the project, with Perpetua Mogobe (RF) owning 46.5%, and a holding company of the Mogobe Local Community Trust having the remaining 2.5%.
