Bess sector Finland

How long is a Bess project in Finland?

New BESS projects in Finland are generally moving to 2-hourdurations, including the largest under-construction at 112.9MWh, by IPP Neoen, which optimiser Capalo AI explained in our coverage of that project last week. Essentially, new state-of-charge rules and increasing opportunities in energy trading have driven the business case beyond 1-hour.

Who owns Bess?

Ownership: BESS as a service provided to users by a third party,or delivery of the technology where the customerowns the BESS. This simplified framework is used as a methodology in the subsequent analysis of storage projects in Finland.

Is Finland a good market for storage as a service business?

The Finnish market has some specific characteristics that make it an interesting targetas a case study regarding storage as a service business. Finland is the first country in the world to have adopted smart electricity metering (hourly metering and remote reading) on a full scale.

How much power does a Bess project have?

However, it isn't clear if that means the megawatt power or the undisclosed megawatt hour capacity. New BESS projects in Finland are generally moving to 2-hour durations, including the largest under-construction at 112.9MWh, by IPP Neoen, which optimiser Capalo AI explained in our coverage of that project last week.

Should Bess be a service provider?

BESS as a service provider should study both the technical and the economic feasibility of the system to be able to make investment decision. In Finland, the DSO has the metering and data delivery responsibility for other energy market participants, but this may not be the case for all European countries.

What enables Bess as a service business model?

The findings of the interviews are placed within the Finnish regulatory framework for storage and demand response services. It is concluded that the key enablers for the BESS as a service business model are a regulatory frameworkthat allows stacked revenues and technological interoperability across a multi-customer business model.
