Kenyan electricity consumers who generate their own power can now sell any excess energy they produce back to the national grid through a system called net-metering. This development comes after the official gazettelement of the Energy (Net-Metering) Regulations, 2024, by the Ministry of Energy's Cabinet Secretary.

The Kenya Electricity Generating Company PLC (KenGen), has been designated to be the Implementing Agency for the Kenyan Battery Energy Storage System (BESS), which is part of the Kenya Green and Resilient Expansion of Energy (GREEN) program, funded by the World Bank.

A.I. Advantage. Businesses need to manage all aspects of their energy use to meet current sustainability goals. Our state of the art software systems can help manage a combination of energy storage and energy generation for load-shifting during peak energy consumption periods this is beneficial for both the grid and the budget.
