Based on the latest data from the EnergySage Marketplace, the average Bolivia, NC homeowner needs a 11.16 kW solar panel system to cover their electric bills. That'll set you back about \$27,788 before incentives. Need a bigger (or smaller) system to offset your electricity use? The average price per watt of solar power in Bolivia, NC is \$2.49/W.

Thin-Film Solar Panels These flexible solar panels are made by spreading silicon and other solar-producing materials in a very thin layer, about the thickness of a human hair, directly onto a large plate that is usually made of glass or ceramics. Less efficient than silicon solar panels, thin-film solar panels are also less expensive to produce.

The average cost to install solar panels is around \$26,600, and most homeowners pay between \$4,500 and \$53,000. Keep in mind that these prices don't consider the federal investment tax credit (ITC), which can effectively reduce those costs by up to 30%.

Bolivia has a high energy potential, both for traditional and alternative energy. Given its geological nature, the country produces more natural gas than oil (62% of total liquids produced from condensed). Its natural gas reserves are the second largest in South America (after Venezuela), but considering those that are liquids free, they are the first. ... Continue ...
