

Could Brazil's leadership help develop sustainable fuels?

The development of sustainable fuels is one of several areas in which the global energy and climate dialogue could benefit from Brazil's leadership. In the IEA's Net Zero Emissions by 2050 Scenario, demand for sustainable fuels - such as biofuels, biogases and low-emissions hydrogen - doubles by 2030 and then nearly doubles again by 2050.

Is Brazil a 'green powerhouse'?

Brazil is poised to play a leading role in the global energy transition with vast renewable energy potential and unique biogenic capabilities positioning it as a 'green powerhouse'; that could add US\$100bn to its GDP by 2030.

Does Brazil need more energy & climate solutions?

Solutions to energy and climate needs will depend on both domestic and international action. Brazil is keenly aware of the imperative of moving faster. It has suffered in 2024 from devastating floods in the state of Rio Grande do Sul and fires in the Pantanal region.

Does Brazil need a sustainable bond?

Brazil's collaboration with the World Bank and the Inter-American Development Bank on a new Sovereign Sustainable Bond allowed it to structure financing tailored to its specific needs and goals. Yet another key task is ensuring that the transition to clean energy is people-centred and addresses the needs of the most vulnerable.

What is the main source of fossil fuel demand in Brazil?

Today, the transport sector is the main source of fossil fuel demand in Brazil, which relies heavily on road transport. More than 90% of the demand for energy in the country's transport sector comes from road transport, this compares to a global average of around 75%.

How can Brazil attract and facilitate sustainable investment?

To attract and facilitate this investment, Brazil must establish robust financing structures, including the development of new financial instruments such as green, social, sustainable and sustainability-linked bonds.

The research concluded that Brazil already has a clean energy matrix compared to other countries, but it is poor in its share of wind and solar energy; the country remains dependent on hydro as the main renewable; and ...

Brazil mainstream energy solutions

The Energy to Change the World. We are GE Vernova. We are helping to accelerate the path to more reliable, affordable, and sustainable energy. With a passion for innovation, we deliver a diverse portfolio of leading technologies we are working closely with our customers to help electrify the world while simultaneously working to decarbonize it.

QHSE officer at mainstream Energy Solutions Limited · Experience: Mainstream Energy Solutions Limited · Education: Ladoke Akintola University of Technology · Location: Abuja · 28 connections on LinkedIn. View Zainab Musa Abdu's profile on LinkedIn, a ...

Mainstream Foundation, the CSR arm of Mainstream Energy Solutions, spearheads community development around the Kainji and Jebba Hydro Power Plants. Since its inception in 2016, it has focused on key areas including Education, Health, Environment, and Community Empowerment, working closely with host communities.

He later became a director at Mainstream Energy Solutions Limited from 2013-2018. He is currently a board member of numerous companies such as Jos Electricity Distribution Company, Highland Integrated Electricity Services Limited, Sanbell Investment Limited to mention but few. He holds a Bachelor's Degree in Law from the University of ...

Looking ahead, we anticipate that solar storage will be a mainstream solution, fully integrated into energy strategies across industries. Our focus remains on providing cutting-edge storage solutions that align with our clients' renewable energy ambitions, contributing to a cleaner, more sustainable energy future.

At Mainstream Energy Solutions Limited, our 2024 mantra is, "The sky is green." Having successfully improved and operated the Kainji and Jebba Hydropower Plants for over 10 years, to becoming concessionaires of the 700MW Zungeru and 40MW Kashimbila HPPs, our goal is to continually boost environmentally friendly, sustainable electricity for homes and industries.

The emergence of energy communities has great potential in Latin America just as in other parts of the world, both to optimize the deployment of local energy resources and to engage consumers in decision-making regarding their energy provision. This chapter examines different forms of energy communities that have emerged in Brazil with a special focus on the ...

The 700 megawatts, MW, capacity power plant, funded by a \$1.3 billion loan from China, has now come under Mainstream's subsidiary's management - Penstock Energy Ltd. Recall that the concession for the Zungeru plant was awarded to Mainstream Energy by Nigeria's Bureau of Public Enterprises, BPE, in February 2023.

Mainstream Energy Solutions Limited (MESL) was incorporated and licensed as a power generating company in 2011. The Kainji and Jebba Hydro Plants (HPP) with a total installed capacity of 1338.4 MW were acquired through a ...

The book's objective is to present the energy transition process in Brazil over time and offer new perspectives on this process in the eyes of a sustainable future. The book unfolds over 15 chapters covering historical, geopolitical, technological, and economical aspects, as well as aspects conceptually familiar to the energy transition such as ...

Mainstream Energy Solutions Limited (MESL) was incorporated and licensed as a power generating company in 2011. The Kainji and Jebba Hydro Plants (HPP) with a total installed capacity of 1338.4 MW were acquired through a concession agreement with the Federal Government of Nigeria in November 2013. The two hydro plants are cascaded 100km apart ...

The Jebba Hydroelectric Power Plant is located in Niger State, north-central part of Nigeria and was commissioned in 1985. It is situated 100 km downstream of the Kainji Hydroelectric Power Plant and equipped with six fixed blade propeller type turbines with a generating capacity of 96.4 MW each, resulting in a total installed capacity of 578.4 MW.

One of the biggest opportunities for the energy transition in Brazil is the diversification of the energy matrix. The country, which has historically depended on hydroelectricity as its main source of energy, has ...

Brazil is a frontrunner in clean energy transitions: among the world's largest economies, it boasts the lowest share of fossil fuels in its energy mix. Holding the G20 Presidency in 2024, Brazil has an opportunity to lead the ...
