

# Breathe battery technologies Monaco

Who is breath battery technologies?

Breathe Battery Technologies | 9,858 followers on LinkedIn. We make batteries better. A lot better. | Breathe is more than a battery performance company. We help you do more with the power you have. Because we believe an electrified future requires superior customer experiences.

How can breathe battery technologies improve the performance of lithium-ion batteries?

Campbell and his team have developed cutting-edge software that can optimize the performance of lithium-ion batteries, improving both charging speed and longevity. Breathe Battery Technologies has created advanced software, Charge and Life, that enhances the performance of lithium-ion batteries.

What is breath physics based battery management software?

(Privacy Policy) Breathe physics-based battery management software increases battery charge speed and cycle life for electric vehicle and consumer electronics brands.

Why should you use breath physics-based battery management software?

With Breathe physics-based battery management software, you can deliver products with faster charging, greater cycle life and zero compromise on safety. As product leaders and battery experts, you constantly have to make impossible trade-offs between charge speed, cycle life, energy density, and profit margins. Until now.

How does breath battery technology work?

The software developed by Breathe Battery Technologies can be seamlessly integrated into standard microcontrollers used in electric vehicles and electronic devices. This compatibility ensures that their technology can be easily adopted without significant hardware modifications. Unleashing Young Geniuses: How Lingokids Makes Learning a Blast!

What makes breath a better battery performance company?

A lot better. Breathe is more than a battery performance company. We help you do more with the power you have. Because we believe an electrified future requires superior customer experiences.

Breathe Battery Technologies strengthens leadership team and underpins growth with appointment of CFO. Leading supplier of physics-based adaptive charging software for batteries, Breathe Battery Technologies ("Breathe") has strengthened its senior leadership team with the appointment of Laurent Cordonnier into the role of Chief Financial Officer, effective ...

Volvo has announced they will use Breathe Battery Technologies' latest charging software in their new generation of fully electric vehicles. Volvo will integrate Breathe's software into their in-house developed battery management platform to optimize the vehicle charging technology, enabling even faster charging

times. In terms of charging from 10% to 80%, Volvo expects this will

Breathe expects that its technology will reduce the time it takes to charge an electric Volvo from 10 to 80 percent charging state by as much as 30 percent, while maintaining the same energy ...

Volvo has partnered with Breathe Battery Technologies (Breathe), becoming the first car company to get access to the latest version of its patented, algorithm-enabled charging software for use on its new electric cars. ...

Breathe Battery Technologies" dream is that one day everyone will breathe clean air. That's why it makes batteries better. About Volvo Car Group. Volvo Cars was founded in 1927. Today, it is one of the most well-known and respected car brands in the world with sales to customers in more than 100 countries. Volvo Cars is listed on the Nasdaq ...

At Breathe, our patented technology provides crystal clear visibility of what is happening on the inside, exploiting this visibility to control the battery in real-time to extract more performance, increasing its safety and longevity in the ...

Breathe Battery Technology A lot of battery enhancements require a new cell or pack design but Breathe has taken a different approach, creating software that works with existing hardware. "A lot of the capability locked up in batteries isn't being exploited," says Campbell. "The idea was to extract this latent capability.

Volvo Cars has teamed up with Breathe Battery Technologies (Breathe), a London-based startup, to incorporate its patented algorithm-enabled charging software into Volvo's fully electric vehicles. Volvo Cars powertrain will have "Breathe Charge" integrated on the BMS. This partnership aims to enhance charging efficiency, potentially reducing the time ...

This is why we created Breathe and brought to the industry a step-change approach: physics-based battery management software. Our technology already brings dramatic improvement to our customers' products, like VARTA's EasyBlade which now reaches 50% state of charge in 43% less time with zero impact on the battery life or Oppo's Reno8 ...

Breathe Battery Technologies is a battery management company developing an electric vehicle batteries charging control software for automotive manufacturers that adapts the charge to every battery's unique condition. Their software improves battery capacity by 5% and allows for twice more uses in the battery's lifetime, without requiring any costly or time consuming hardware ...

Breathe Battery Technologies has created advanced software, Charge and Life, that enhances the performance of lithium-ion batteries. This software reduces charging times and prevents battery degradation, ensuring ...

Breathe signed a supply agreement with Volvo in March 2024. Breathe Battery Technology. The benefits can

be substantial. "In Volvo"s case, under typical environmental conditions, we can help ...

London-based startup Breathe Battery Technologies has raised £1.5m to scale up and accelerate the deployment of its intelligent battery management algorithms in electric vehicles and smartphones. Battery management systems are the brains behind batteries in devices and vehicles. They play a critical role in enabling batteries to be used safely and to ...

About Breathe Battery Technologies Breathe Battery Technology ("Breathe") is more than a battery performance company. Since being spun out of Imperial College in 2019, Breathe"s focus has been on building battery technology to contribute to a faster, better and more sustainable electrification of the world.

Breathe Battery Technology, the London-based supplier of physics-based battery management software, has strengthened its organisation by appointing Laurent Cordonnier as Chief Financial Officer. Cordonnier joins ...

Breathe Battery Technologies raises £1.5m to make batteries charge faster and last longer in EVs and smartphones Breathe"s Lincc software is the first to bring advanced battery management techniques to electric vehicles and consumer electronics The company was founded to accelerate the shift to electric vehicles and combat climate change and air pollution £1.5m ...
