

What is Brite solar?

Brite Solar is a nanomaterials company developing and marketing solar glass products with variable transparencies for applications in agriculture. Brite's solar glass applies to greenhouses and open field agri-cultivations and yields energy autonomous operation, water saving, and thus sustainable agriculture. Brite develops unique technologies.

What is Brite solar glass?

Brite's solar glass applies to greenhouses and open field agri-cultivations and yields energy autonomous operation, water saving, and thus sustainable agriculture. Brite develops unique technologies. Our society is urgently in need of technologies for increased production of green energy and improved energy efficiency.

How much did Brite solar raise in venture capital?

In January it announced raising \$9.26 million in venture capital. Greece-based specialty solar module manufacturer Brite Solar has developed bifacial photovoltaic panels for applications in agrivoltaic greenhouses and canopies. The modules are based on novel glass coating materials and deposition technology developed by Brite Solar itself.

How are Brite solar modules made?

The modules are based on novel glass coating materials and deposition technology developed by Brite Solar itself. The coatings are placed onto the front and back of the top glass in standard glass-glass monocrystalline silicon solar modules.

Does Brite solar have anti-reflective & hydrophobic coatings?

Early installations have produced extremely promising results," Brite Solar CEO, Nick Kanopoulos, told pv magazine. He explained that one of the coatings has both anti-reflective and hydrophobic properties. It is deposited on the outside of the top-side glass.

Why are Brite solar panels better than conventional solar panels?

Power generation is important as a source of income or self-use, but it is secondary to farming," said Kanopoulos, making the point that Brite Solar panels have a lower power rating, compared to similarly sized conventional modules, because they are optimized for photosynthetic energy needed for plant growth.

I Brite Solar idrythike to 2009 me stocho tin anaptyxi enos neoy typoy fotovoltaikoy panel prosarmosmeno stis apaitiseis ton kalliergeion sta thermokipia alla kai stis anoichtoy typoy kalliergeies.

Brite Solar is opgericht in 2009 met het doel een nieuw type PV-paneel te ontwikkelen dat is aangepast aan de eisen van de glastuinbouw. Met een sterke achtergrond in nanomaterialen en depositietechnieken voor glassubstraten, werken we aan aanvullende PV-oplossingen voor open veldgewassen, evenals aan energiebesparende oplossingen voor de gebouwde omgeving. ...

Brite Solar was founded in 2009 aiming to develop a new type of PV panel adapted to the requirements of greenhouse horticulture. With a strong background in nanomaterials and deposition techniques for glass substrates, we have been working in additional PV solutions for open-field crops, as well as on energy saving solutions for the built environment. Brite's ...

Brite Solar is dedicated to the deployment of advanced nanotechnology materials to create new types of architectural glass that can reduce the energy footprint for buildings by reducing energy for heating, cooling and lighting and at the same time produce electrical energy from light. Innovations in Glass.

? Brite Solar among the top 120 deep-tech companies selected by the @eicscalingup ! ? We are thrilled to announce that Brite Solar has been recognized as one of the 120 most innovative deep-tech companies selected by the EIC Scaling Club! ? This prestigious recognition highlights our cutting-edge work in agrivoltaics and sustainable solar energy solutions.

Greek startup Brite Solar is building a production line in Patras for transparent solar panels for agrivoltaic production. It completed a series A financing round earlier this year. Thessaloniki is becoming a hub for innovative ...

Brite Solar es una empresa de nanomateriales que desarrolla y comercializa productos de vidrio solar con transparencias variables para aplicaciones en agricultura. El vidrio solar de Brite se aplica a invernaderos y cultivos agr&#237;colas a campo abierto, proporcionando operaci&#243;n energ&#233;tica aut&#243;noma, ahorro de agua y, por lo tanto, una ...

Brite Solar is toegewijd aan de inzet van geavanceerde nanotechnologie ten dienste van deze doelen. We streven ernaar om de multifunctionele gebruiksmogelijkheden van landbouwgrond te bevorderen voor extra opwekking van zonne-energie, en om nieuwe soorten architecturaal glas te ontwikkelen die de energievoetafdruk van gebouwen kunnen verminderen.
