British Virgin Islands texel energy

To transition to a more sustainable electricity grid, the British Virgin Islands can look at adopting low-carbon technologies such as wind, solar, and potentially, nuclear energy.

TEXEL Energy will now also include new business areas such as TEXEL Flare Gases, TEXEL Defence, and TEXEL Biofuels, all of which leverage the same core technology for converting thermal energy into true green electricity and heat. The industrial company that develops and produces this technology will operate as a subsidiary under TEXEL Energy ...
