

Does Brunei use natural gas?

The majority of natural gas is exported. Nevertheless, the domestic natural gas utilisation still dominates the primary energy supply (80%). Oil covers the remaining 20% of primary energy supply. Brunei's total energy supply is declining in proportion due to low oil price in 2016 which makes Brunei hold their oil production.

How can Brunei reduce energy consumption?

Brunei has implemented the National Appliance Standards and Labelling Regulation, which aims at reducing domestic energy consumption in order to enable higher exports of gas. The Energy Efficiency and Conservation Program envisages the reduction of energy use by 45% by 2035 based in 2005 level

What is the primary energy supply of Brunei?

The primary energy supply of Brunei comes exclusively from fossil fuels (Figure 1) with total of 3,420 ktoe. The majority of natural gas is exported. Nevertheless, the domestic natural gas utilisation still dominates the primary energy supply (80%). Oil covers the remaining 20% of primary energy supply.

Can Brunei change from natural gas to hydrogen?

"The country can also opt to change from natural gas production to hydrogen," he said. The Japanese energy expert also said Brunei has the potential to benefit from its association with Japan, Australia, and other countries by fostering collaboration for the transfer and assistance of green technology.

Does Brunei have a solar power plant?

Brunei has already implemented a solar demonstration power plant with the capacity of 1.2 MW. It is planned to expand this plant in the future. Moreover, in the long-term Brunei aims to develop offshore wind projects with the total capacity of between 18 and 20 MW.

Should Brunei adopt CCUS Technology?

Brunei, a small country with limited solar energy opportunities, should focus on utilising its gas resources to produce hydrogen while also implementing carbon capture, utilisation and storage (CCUS) technologies. By adopting this approach, the country can efficiently harness its gas reserves and take significant steps towards reducing emissions.
