

Does Brunei have a primary energy supply?

Nevertheless, the domestic natural gas utilisation still dominates the primary energy supply (80%). Oil covers the remaining 20% of primary energy supply. Brunei's total energy supply is declining in proportion due to low oil price in 2016 which makes Brunei hold their oil production.

Is Brunei a natural gas or oil based country?

Brunei's total primary energy supply (TPES) and total final energy consumption (TFEC)'s historical oil and gas trend, particularly, 80% and 20% of TPES are made up of oil and natural gas, respectively. Oil saw annual increase of 0.7% from 2010 to 2017, however natural gas saw annual growth of -0.9% because of a decline in natural gas output.

Why does Brunei have a low energy supply?

Brunei's total energy supply is declining in proportion due to low oil price in 2016 which makes Brunei hold their oil production. Figure 2 presents the electricity generation in the power sector.

Why is Brunei Darussalam independent from energy imports?

The country is independent from energy import, due to its vast domestically available oil and gas reserves. Brunei Darussalam has the ninth largest Liquefied Natural Gas (LNG) reserve in the world as well as the fourth largest oil producer in South East Asia region.

Will Brunei cover 10% of its electricity consumption by 2035?

According to Brunei Energy White Paper, the country is planning to cover 10% (954 GWh) of its electricity consumption from renewable energy by the year of 2035. The document sets the ground for the renewable energy policy.

Does Brunei Darussalam have a high rate of electrification?

According to the World Energy Outlook which published in 2016 by IEA, Brunei Darussalam has achieved 100% rate of electrification with only 6% of transmission loss. According to Brunei Energy White Paper, the country is planning to cover 10% (954 GWh) of its electricity consumption from renewable energy by the year of 2035.

Brunei, a small country with limited solar energy opportunities, should focus on utilising its gas resources to produce hydrogen while also implementing carbon capture, utilisation and storage (CCUS) technologies. By ...
