

Bte energy Central African Republic

What is BTE renewables?

Actis set up the renewables platform in 2017 after it acquired the Kipeto wind project in Kenya in its development stage. In 2019, it expanded the platform with the purchase of BioTherm Energy, a South Africa-focused company, and rebranded it as BTE Renewables. BTE aims to develop utility-scale solar and wind projects across the African continent.

Who is BTE & inspire?

BTE was one of the four founders, alongside Actis, of the Initiative for Social Performance in Renewable Energy (INSPIRE), which was established as a non-profit company to support skills development to maximise the economic development and transformational potential of South Africa's renewable energy sector.

Why should you choose actis for BTE renewables?

Actis' operational experts ensure that BTE Renewables follows international best practices in due diligence, engineering, procurement, and construction (EPC) contracting and financing. This also enables the platform to benefit from Actis' global renewable energy experience. Actis has created a sustainability leader in BTE Renewables.

What does BTE do?

BTE aims to develop utility-scale solar and wind projects across the African continent. The company has a portfolio of six operating projects totalling nearly 500MW, five in South Africa and one in Kenya. The transaction involves a transfer of the Kenyan assets from Engie to Meridiam upon completion in the fourth quarter of 2023.

Why did BTE buy Engie?

With BTE's acquisition, Engie will benefit from an additional 340MW net of renewable operating assets in South Africa. These include 150MW in wind and 190MW in solar. The acquisition also includes a portfolio of more than 3GW in advanced development pipelines and projects, and a workforce of 80 professionals.

Is BTE a sustainable leader?

Today BTE is positioned as a highly valuable sustainability leader at the heart of Africa's Just Transition.
