Why is Burkina Faso launching a solar power plant in Komsilga?

Loading... In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

How has Burkina Faso changed over the years?

Burkina Faso has made remarkable progress in recent years, with an increase in installed capacity from 324.6 megawatts (MW) in 2017 to 410 megawatts in 2019. The share of renewable energy also surged from 9.4% in 2015 to 18.36% in 2019.

Will Burkina Faso build a nuclear power plant?

Burkina Faso's military leaders have signed a deal with Russia to build a nuclear power plant to increase electricity supplies. It is the junta's latest move to align itself with Russia after falling out with most of its Western partners. The junta has turned to Russia for economic and military support since it seized power last year.

Does Burkina Faso have a solar project?

“Burkina Faso Advances Solar Initiative With EUR45.7 Million Loan From China's Export-Import Bank”, Solar Quarter. Navi Mumbai, Maharashtra, India. Retrieved 10 May 2024. ^a b c Benoit-Ivan Wansi (5 January 2024). “Burkina Faso: 2 solar photovoltaic power plants (68 MWp) inaugurated in Kodou and Poni”.

How does Burkina Faso get its electricity?

The deal is part of Burkina Faso's target to achieve 95% electricity access for urban areas and 50% for rural areas by 2030. Burkina Faso gets most of its electricity from biofuels like charcoal and wood while oil products account for one-third of the total energy supply, according to the International Energy Agency.

Which energy source is not included in Burkina Faso?

Traditional biomass- the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Burkina Faso: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

Burkina Faso's armed forces remain fragmented, and power has changed hands in an arbitrary, tumultuous manner, underscored by the two coups in 2022 and a reported coup attempt in September 2023. In parts of the country, armed militant groups target local leaders for assassination and abduction, effectively controlling the territory; as much ...

Burkina Faso futuri power

State-owned power plants (Burkina Faso, Morocco) clearly seem to favor social acceptance, with such plants being sources of national pride, often seen as government or country choices, and the nation in question ultimately feeling pride of ownership of this rewarding energy technology. From a practical point of view, we note that capacity ...

The electrification rate in Burkina Faso remains low by regional standards, at 19 percent overall with 66 percent in urban areas and just 3 percent in rural areas. The electricity supply is just enough to precariously meet the increasing annual demand which increases by 10 percent per year. The government's strategy to increase supply while reducing the cost of ...
