

Burkina Faso inhenenergy co ltd

Who is inhenenergy?

Inhenenergy Co.,Ltd.,founded in 2019,is a holding subsidiary of the prestigious INHE Group. With a registered capital of RMB 50,000,000,Inhenenergy focus all efforts on R&D,production,sales,and post-sales services of PV storage inverter &software system. Honorably,Inhenenergy was awarded the National High-tech Enterprise.

Who is inhe energy?

INHENERGY CO., LTD., a holding subsidiary of INHE, is a High-Tech company specialized in design, development and manufacturing of string inverter products and systems -- core components of distributed photovoltaic power generation system.

Is inhenenergy a high-tech enterprise?

Honorably,Inhenenergy was awarded the National High-tech Enterprise. The core R&D team of Inhenenergy comes from top tier companies in the solar power industry,and on average have more than 10 years of relevant experience.

Where is inhenenergy based?

Based in the Greater Bay Area of China,Inhenenergy built a massive Industrial Park of 45,000m² in Zhuhai High-tech Zone with high-grade R&D Center,Electrical Lab,Massive Manufacturing Center,and passed through ISO9001. Inhenenergy has strict inspection and control process for IQC,manufacturing process and OQC.

C'est dans ce contexte que Faso Energy a vu le jour. C'est le premier fabricant de modules photovoltaïques au Burkina Faso, appelés communément plaques solaires. Une équipe du Faso a fait une immersion dans les installations de cette société. Lisez plus.

Last month, a delegation from SONABEL, the national power company of Burkina Faso, visited the headquarters of CWPC. On September 19, Li Renchao, Chairman of CWPC, led the company's technical, commercial, investment and financing teams to meet with SONABEL again in Ouagadougou, the capital of Burkina Faso.

Burkina Faso benefits from daily sunlight of 5.5 KWh/m² for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an average of 1620 KWc. This growth in renewable energy has been facilitated by state subsidies on imported solar equipment and the adoption of new legislation regulating the

Background PV/diesel microgrids are getting more popular in rural areas of sub-Saharan Africa, where the national grid is often unavailable. Most of the time, for economic purposes, these hybrid PV/diesel power plants in rural areas do not include any storage system. This is the case in the Bilgo village in Burkina Faso, where a PV/diesel microgrid without any ...
