

Shinemonitor System, based on the back-end server products of Eybond IOT cloud, provides users with application services such as power station management, equipment data acquisition, analysis, calculation, storage, alarm push, power station on-site video monitoring, etc. through advanced computing such as cloud computing, big data, intelligent sensor, etc. for the needs ...

Eybond has rich experience in monitoring the energy IOT industry. You only need to raise the demand and leave the rest to us. At the same time, we have rich software products related to energy IOT industry. ... Building 10, Zhiheng Sicense & Technology Park, Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.

Eybond provide customers with diversified and multi scenario IOT terminal equipment to protect your IOT communication. According to the needs of customers, we will build a reliable, independent, secure and private software system through private cloud deployment solutions. ... Nanshan District, Shenzhen, China +86-755-89992588. Solutions ...

Plug series pluggable datalogger can support GPRS and Wi-Fi. With the advantages of IP65 protection level, simple installation, strong anti-interference ability, it is no need to configure power supply and antenna; it can support the remote control, remote debugging, remote upgrading and other functions of the device, and can view the working status and power generation of the ...

Shenzhen Eybond Co., Ltd, established in 2014, is a high-tech enterprise specializing in technology research, product development and industrial application on internet+new energy. Based on rich industry experience and new technology on the internet of things, cloud computing, and big data, Eybond has achieved great success in energy monitoring ...

Shenzhen Eybond Co., Ltd, established in 2014, is a high-tech enterprise specializing in technology research, product development and industrial application on internet+new energy. Based on rich industry experience and ...

Eybond has a deep photovoltaic background and rich experience in the Internet of things industry. It cooperates with inverter manufacturers to develop photovoltaic intelligent operation and maintenance solutions for different occasions. ... Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.

Eybond is committed to the energy industry, developed by itself can be compatible with a variety of types of different brands of data collector and powerful control can treasure energy management system. Related equipment for real-time monitoring and control of the energy industry, has realized the remote online

Burundi shenzhen eybond co ltd

monitoring of energy equipment ...

NEMonitor System, based on the back-end server products of Eybond IOT cloud, provides users with application services such as data collection, analysis, calculation, storage, alarm push, peak cutting and valley filling, energy-saving strategy, etc. of energy storage device through cloud computing, big data, intelligent sensor and other advanced ...

Shenzhen Eybond Co., Ltd, founded in 2014, is a high-tech enterprise specializing in solar PV system integration and monitoring, smart energy management and service. We have by far served more than 1000 EPC customers, solar plant owners And installers etc in all over the world.

Eybond research and development team is committed to the photovoltaic monitoring industry, and has developed a photovoltaic monitoring system that can be compatible with various types of data collectors of different brands and powerful SmartClient.

According to the characteristics of UPS, Eybond provides a variety of scenarios for UPS monitoring to ensure the normal operation of UPS. Wi-Fi Local(near field) Monitoring Scheme. ... Building 10, Zhiheng Sicense & Technology Park, Nanshan District, Shenzhen, China +86 ...

Eybond provide customers with diversified and multi scenario IOT terminal equipment to protect your IOT communication. According to the needs of customers, we will build a reliable, independent, secure and private software system through private cloud deployment solutions.

RTU series industrial series datalogger can support communication modes such as Wi-Fi, GPRS, 4G and Ethernet, and collect device data through multiple interfaces such as RS-485 and RS-232 has low requirements for the hardware interface and transmission environment of the device, and is perfectly compatible with inverter, energy storage machine, environmental ...
